1. Concept

The cryptocurrency space is full of opportunity, but it's also fraught with risk. Scams and fraudulent activities have long plagued investors, leaving many with substantial losses and little recourse. Out of this need for change, XRP Recovery was created—born from personal losses and driven by the mission to restore trust in the XRPL. Now a division of Trimaera, XRP Recovery is committed to delivering innovative recovery solutions, increasing transparency, and creating new investment opportunities that support a stronger, more resilient ecosystem.

XRP Recovery isn't just another token project—it's a fundamental shift in how the XRPL community fights back against fraud. At its core are CHIT and CHING, two tokens designed not only to compensate affected investors but also to reinforce confidence in the network. This initiative goes beyond addressing past scams; it actively works to dismantle fraudulent schemes, challenge bad actors, and restore lost value to the ecosystem.

By combining financial protection with innovative recovery strategies, XRP Recovery is shaping a future where investors have a safety net, transparency is the standard, and the XRPL is a safer place for all participants.

2. Trimaera

Trimaera is all about pushing the XRPL forward. We're here to build tools, develop solutions, and create a more secure and transparent ecosystem for everyone. Whether it's improving accessibility, strengthening security, or driving innovation, our goal is to make blockchain work better for real users and real projects.

We're not just another blockchain company—we're focused on long-term impact. By developing practical, forward-thinking solutions, Trimaera is committed to helping the XRPL grow in a way that's sustainable, secure, and built for the future.

3. What is the problem?

The rapid growth of the XRPL has opened doors for token creation but also for exploitation. In early 2024, the XSPRINT rug pull left investors at a loss, prompting a group of affected individuals to take action and restore trust in the community.

XRP Recovery takes a proactive stance against scams. While we can't stop them all, our rescue token helps mitigate losses and rebuild confidence in the XRPL ecosystem.

4. How it Works

When a project fails due to a scam or rug pull, XRP Recovery steps in to provide a structured path forward for affected investors. Rather than leaving victims without recourse, we utilize a tiered recovery system designed to restore confidence in the XRPL ecosystem while reinforcing the value of CHING.

At the heart of this process is CHIT, our dedicated rescue token. CHIT is airdropped directly to impacted wallets, serving as a bridge between lost investments and new opportunities. Holders can then convert CHIT into CHING through a structured release system, ensuring stability while maintaining the integrity of the ecosystem.

This approach isn't just about compensation—it's about long-term sustainability. By implementing a controlled distribution model, we protect CHING's value while providing tangible support to those affected. Our goal is not only to assist investors in difficult times but to strengthen the foundation of the XRPL community as a whole.

For a detailed breakdown of how rescue payouts are calculated, including eligibility criteria and compensation tiers, please refer to the document:

[Understanding Your Rescue Payout](#)

5a. Tokenomics - CHIT

CHIT was originally issued with a total supply of 100 billion tokens, with 10 billion made available during the initial decentralized offering (IDO), all of which were sold at launch. However, given CHIT's unique role within the XRP Recovery ecosystem, it soon became clear that maintaining such a large supply was unnecessary.

Unlike traditional tokens, CHIT functions solely as an intermediary between impacted investors and CHING. It is not designed for long-term holding or speculative trading. Instead, it serves as a transitional asset that allows affected wallets to access compensation in a structured and controlled manner.

Recognizing this, a significant burn event was executed, reducing CHIT's total supply to under 10 billion tokens. Trimaera does not retain a dedicated project allocation, holding only the CHIT that has been returned for conversion to CHING. As a result, CHIT is now effectively fully decentralized, with no centralized control or reserve allocation.

This unique tokenomics structure ensures that CHIT remains purely functional, serving its purpose within the XRP Recovery process without creating unnecessary inflation or market dilution.

5b. Tokenomics - CHING

Originally issued with a 70 billion token supply and actively trading for the past 12 months with a reduced total supply of 50 billion, we have gained valuable insights into the optimal asset allocation needed to efficiently manage the XRP Recovery ecosystem and its compensation framework. This revised Whitepaper introduces the updated tokenomics of CHING, reflecting a more sustainable and structured distribution model.

Total Supply: 25 Billion

Development: 2 Billion

Rewards & Incentives: 2 Billion

Team Allocation: 4.5 Billion

Circulating Supply: 6.5 Billion

Compensation Fund: 10 Billion

5b. Tokenomics - CHING

1. Circulating Supply (6.5 Billion)

Represents the portion of CHING actively traded and held by the community. This supply ensures market participation, liquidity, and accessibility for new and existing investors.

2. Team Allocation (4.5 Billion)

Securely stored and reserved for our core team, these funds will be gradually released over a two-year period with quarterly unlocks to ensure a responsible and structured distribution.

3. Compensation Fund (10 Billion)

Dedicated for the core function of XRP Recovery - compensating investors affected by scams and rug pulls. This ensures the availability of CHING for eligible rescues, maintaining trust in the ecosystem.

4. Development Fund (2 Billion)

Allocated for future innovations, infrastructure, and integrations that enhance the XRP Recovery platform. These funds enable us to build new features and improve our services.

5. Rewards & Incentives (2 Billion)

Designed to encourage community engagement, liquidity provision, and ecosystem growth. This allocation supports initiatives like staking rewards, LP incentives, and other strategic programs aimed at strengthening CHING's value.

5c. Tokenomics - IDO

The initial decentralized offering (IDO) of CHIT and CHING marked a defining moment for Trimaera, raising over 120,000 XRP and providing the foundation for our expansion beyond compensation services. This successful launch not only secured the resources needed to build and sustain the XRP Recovery ecosystem but also enabled the development of broader solutions that enhance the security and integrity of the XRPL.

Through careful management of these funds, we have been able to build out our platform, expand our service offerings, and commit to the long-term growth of the XRP Ledger. A significant step in this commitment has been the purchase and management of our own XRPL validator. Unlike most validators, ours is a fully custom system hosted in our own data center, ensuring maximum security, reliability, and decentralization. This infrastructure investment reflects our dedication to maintaining a strong, independent presence within the XRPL ecosystem while reinforcing trust and stability for all stakeholders.

The success of the IDO has positioned Trimaera as more than just a recovery initiative—it has evolved into a comprehensive security-driven ecosystem that continues to innovate, protect, and contribute to the future of the XRP Ledger.

6. Wallets

To ensure full transparency, XRP Recovery publicly discloses all project wallets, allowing the community to track fund movements, verify allocations, and maintain trust in our recovery and compensation efforts.

7. Roadmap

Launch & IDO - April 2024

- Successfully launched CHIT and CHING through an IDO, raising over 120,000 XRP.
- Established initial liquidity and compensation reserves to support affected investors.
- Formed the foundation of XRP Recovery as a division of Trimaera.

Year One - Laying the Foundation (Apr 24 - Mar 25)

- Launch of the ResXue Bot – An automated recovery system enabling seamless compensation for victims of scams and rug pulls.
- Over \$4,000 in compensation distributed – Direct support provided to affected investors.
- Validator Deployment – Investment in a custom-built XRPL validator hosted in our own data center to reinforce the network and ensure long-term decentralization.
- Initial market liquidity expansion – Strengthening CHING's presence in AMM pools to support price stability and accessibility.
- XRP Recovery Resolution Implementation – A financial commitment to CHING through structured buybacks and liquidity injections, allocating 7,500 XRP annually or \$22,500, whichever is lower.

7. Roadmap

Year Two - Expansion & Utility (Apr 2025 - Mar 26)

- XRP Recovery Dashboard Release – A full-service platform designed to streamline recovery and compensation processes, giving users real-time access to claim and track payouts.
- Key Partnerships & Ecosystem Expansion – Collaboration with external projects to extend compensation tools to a broader audience, increasing recovery accessibility across the XRPL.
- Further liquidity growth – Continued efforts to reach a 5%+ liquidity-to-market cap ratio with incentives for liquidity providers.

Year Three - Long-Term Development & Integration (Apr 26 - Mar 27)

- Integration with Trimaera Pro – Enhancing XRP Recovery capabilities within Trimaera's premium ecosystem, offering higher-tier compensation and additional security features.
- Continued Service Expansion – Scaling recovery operations to cover more projects and ensure XRP Recovery remains the premier security-focused initiative on the XRPL.
- Sustained market support & liquidity strategies – Strengthening CHING's financial health through strategic liquidity injections and responsible treasury management.

8. Team

Nolan

Founder & CMO of Trimaera

Nolan is a seasoned process improvement specialist, bringing a wealth of expertise from his tenure at a leading multinational engineering and technology company. With a background in driving operational efficiency and enhancing workflows, Nolan plays a pivotal role in ensuring the smooth execution of our strategic initiatives. His dedication to streamlining processes and maximising productivity contributes significantly to the success of our team.

Marcus

Founder & CTO of Trimaera

Marcus is a seasoned systems engineer with a passion for innovative technology and its transformative potential. With a background in engineering, Marcus brings a wealth of technical expertise and problem-solving skills to the team. He is dedicated to leveraging his knowledge to drive the development and implementation of cutting-edge solutions. Marcus's commitment to excellence and drive for continuous improvement make him an invaluable asset to the team.

8. Team

James

Founder & COO of Trimaera

James brings over 15 years of entrepreneurial experience to the team, having successfully operated his own businesses in the retail and logistics sectors. With a proven track record of managing large teams, James brings invaluable leadership and strategic insight to our project. His expertise in team management and business operations is instrumental in driving our vision forward.

9. Conclusion

XRP Recovery is committed to restoring trust and stability in the XRPL ecosystem. Through a structured recovery process, we provide real support to affected investors, using CHIT to grant access to CHING and rebuild confidence.

With a clear roadmap and a focus on long-term growth, we're expanding our services, strengthening CHING, and reinforcing security within the XRPL. Our mission is simple—build a safer, more resilient ecosystem driven by trust and accountability.
